INDEX TO ASSESSMENT REPORTS, OPEN FILE MAPS, OPEN FILE REPORTS AND PUBLICATIONS FOR 1989

INTRODUCTION

Report 90-2 is a bibliographic index to all the Nova Scotia Department of Mines and Energy assessment reports, open file maps, open file reports and publications that became available during 1989.

Previously published volumes of indexes to assessment reports include **Report 81-4 Index to Assessment Reports 1864 to 1980** and **Report 86-2 Index to Assessment Reports 1981 to 1985**. Previously published volumes of indexes to publications, open file reports, open file maps and theses include **Report 81-6 Index to Publications, Open File Reports and Theses 1862 to 1980** and **Report 86-4 Index to Publications, Open File Reports, Open File Maps and Theses 1981 to 1985**.

Beginning in 1986, the separate, annual indexes to assessment reports and to publications, open file reports and open file maps were combined to form a single index. The first such index was **Report 87-3 Index to Assessment Reports, Publications, Open File Reports and Open File Maps for 1986**; the second such index for 1987 was **Report 88-2**; the third such index for 1988 was **Report 89-2**. **Report 90-2** is the fourth index in this series.

All the assessment reports cited in this index have been microfilmed and can be consulted in the libraries of the Halifax and Stellarton offices of the Department, where they are filed on the basis of their report numbers. Microfiche copies of these reports can be purchased directly from Precision Microfilming Services, 3770 Kempt Road, Halifax, Nova Scotia, B3K 4X8 (902-455-5451). If ordering microfiche copies of assessment reports, please quote the full assessment report number (e.g. AR 87-001).

All the open file maps, open file reports and publications cited in this index can be consulted in the libraries of the Halifax and Stellarton offices of the Department. All the publications can be purchased from both departmental libraries, and microfiche copies of open file reports and open file maps can be purchased directly from Precision Microfilming Services.

INDEX ORGANIZATION

Report 90-2 is eight separate indexes under one cover, namely: a claim map index to Nova Scotia Department of Mines and Energy exploration assessment reports (PART 1); a report number index (cross reference list) to assessment reports (PART 2); an exploration company and licensee index (cross reference list) to assessment reports (PART 3); an index to Nova Scotia Department of Mines and Energy open file maps (PART 4); an index to Nova Scotia Department of Mines and Energy open file reports (PART 5); an index to Nova Scotia Department of Mines and Energy publications (PART 6); an NTS map index (cross reference list) to the open file maps, open file reports and publications (PART 7); and an author index (cross reference list) to the open file maps, open file reports and publications (PART 8).

PART 1. Claim Map Index To Assessment Reports

The Claim Map Index to Assessment Reports is an index to all the mineral exploration and onshore petroleum exploration assessment reports that became public information during 1989.

The Claim Map Index is organized on the basis of the Nova Scotia Department of Mines and Energy claim map system. The claim map system (Fig. 1) is used by the Nova Scotia Department of Mines and Energy for map staking of mineral exploration claims. This claim map system is based on the National

Topographic System (NTS), whereby each claim map is one-quarter of a standard 1:50 000 NTS map. For example, NTS map 11D/10 consists of claim maps 11D/10A, 11D/10B, 11D/10C and 11D/10D, these maps being lettered in a clockwise direction from the southeastern corner of NTS map 11D/10.

PART 2. Report Number Cross Reference List

Assessment reports are assigned a sequential, five digit report number (e.g. AR 87-001, AR 87-002 etc.) which reflects their year of receipt in the Department.

The Report Number Cross Reference List lists, in ascending order, all the report numbers from the assessment reports cited in PART 1. Under each report number are cited the company and licensee responsible for the generation of that report, and the claim map(s) on which the assessment work was conducted.

PART 3. Exploration Company and Licensee Cross Reference List

This Cross Reference List lists, in alphabetical order, all the exploration companies and licensees responsible for generation of the assessment reports cited in PART 1. Under each exploration company or licensee name are cited the report number of each assessment report they are responsible for generating, and the claim map(s) on which the assessment work was conducted.

PART 4. Index to Open File Maps

The Open File Maps Index lists the titles of unpublished maps concerned with the geoscience of Nova Scotia that were identified, generated or collected by the Nova Scotia Department of Mines and Energy during 1989. Open file maps (OFMs) can be authored by any individual, agency or organization. Open file maps do not necessarily originate from within the Nova Scotia Department of Mines and Energy, although many do. Open file maps are assigned a sequential map number (e.g. OFM 89-001, OFM 89-002 etc.) reflecting their completion date. When it is impossible to obtain a definitive completion date for a map, the prefix "ND" (for "No Date") is assigned in the date part of the OFM number (e.g. ND - 215).

PART 5. Index to Open File Reports

The Open File Reports Index lists the titles of unpublished documents concerned with the geoscience of Nova Scotia that were generated or collected by the Nova Scotia Department of Mines and Energy during 1989. Open file reports (OFRs) can be authored by any individual, agency or organization. Open file reports do not necessarily originate from within the Nova Scotia Department of Mines and Energy, although many do. Open file reports are assigned a sequential, five digit report number (e.g. OFR 89-001, OFR 89-002 etc.) which reflects their year of generation or receipt in the Department.

PART 6. Index to Publications

The Publications Index lists the titles of the various Nova Scotia Department of Mines and Energy published documents that became available during 1989. The titles are sorted alphabetically by document type (annual reports, bulletins, papers, reports etc.) and are sub-sorted chronologically from first to most recent within each document category.

PART 7. NTS Map Cross Reference List

The NTS Map Cross Reference List is a hierarchical, geographic index to the open file maps, open file reports and publications listed in PARTS 4, 5 and 6. It is organized on the basis of the National Topographic System (NTS) of map sheets for Nova Scotia (Fig. 1). The NTS map sheet assigned to a document or map reflects the geographic location and extent of the document or map in Nova Scotia. Consequently, a 1:1 000 000 map quadrangle (e.g. map 11), a 1:250 000 map quadrangle (e.g. map 11D), a

1:125 000 map quadrangle (e.g. map 11D/NE), a 1:50 000 map quadrangle (e.g. map 11D/10), or a claim map (e.g. map 11D/10A) may be assigned to a particular document or map. Documents that are very general and province-wide in their geographic extent have been assigned an unofficial NTS map value "NOVA SCOTIA". Documents concerned with the offshore regions of Nova Scotia are cited under the heading "OFFSHORE". Under each NTS map sheet are cited the document report number and page number (where applicable) and the corresponding author name(s).

PART 8. Author Cross Reference List

The Author Cross Reference List is an alphabetic listing of all the authors cited in the open file maps, open file reports and publications indexes in PARTS 4, 5 and 6. When a document has no personal author it is cited under the originating agency or institution. If both the personal name and agency name are unknown, the document is cited under ANONYMOUS. Under the name of each author are cited the document report number and page number (where applicable) of each reference they are responsible for generating, and the NTS map(s) covered by each reference.

GEOSCAN

Report 90-2 was generated from **GEOSCAN**, which is a bibliographic database providing access to publicly available geoscience literature concerning the Canadian landmass and offshore regions. The database is co-operatively produced from the indexing contributions of fourteen federal, provincial and professional geoscience organizations located throughout Canada. The Geological Survey of Canada co-ordinates these indexing activities and provides computer resources in support of **GEOSCAN**. The Nova Scotia Department of Mines and Energy is an active participant in **GEOSCAN**, and specific search enquiries and custom indexes can be generated upon request from **GEOSCAN**, using on-line terminal connections in the Halifax office, or through the National **GEOSCAN** Centre, Geological Survey of Canada, in Ottawa.

ACKNOWLEDGMENTS

We thank the staff at the National **GEOSCAN** Centre, Ottawa, for their help in the preparation of this index. At the Nova Scotia Department of Mines and Energy, we also thank Susan Saunders and Darryl Robar for their dedicated efforts in entering all our information into **GEOSCAN**; Lois Miller and Susan Saunders for word processing; Doug MacDonald for his editorial assistance; and Dr. Richard Potter, Assistant Deputy Minister, and Dan Murray, Director of the Mineral Development Division, for their continued support and encouragement of our **GEOSCAN** activities.
